

Spring is almost here. It's time to finish our dredging project. Dredge America plans to be on site the first week of April to get everything prepped and ready for the year. They must leave the week of April 19 for training back at their headquarters. Dredging will resume the following week. They will be starting in Waterfront Bay where they left last year.

We have received all of the state funds that Speaker Vos approved for our dredging project. As we have stated in the past, we will provide feedback on how we plan to disburse these funds when the dredging is completed. These funds are being held in an interest-bearing account, and once dredging is complete, we will work with the Town to determine how best to use the funds to reduce costs for everyone and pay back the ones that paid up front.

We appreciate everyone's continued support throughout this process.
